2:00p - 4:30p

The New York City Climate Coalition Launch

Presented by

The Human Impacts Institute

The press event will also mark the donation of a solar powered generator to the Park, which was awarded to the Human Impacts Institute through the Green Mountain Energy Solar Challenge. The Coalition meeting will be a hands-on training for all interested in addressing climate in their neighborhoods. All are welcome to attend and will be provided with information on the first campaign of the Coalition, focusing on increasing energy efficiency in buildings.
